

Security Policy

Reach Subsea shall ensure the confidentiality, integrity and availability of information and assets throughout the organization and its operations. This shall be based on sound risk management, legal and regulatory requirements, contractual obligations and business needs.

Safeguarding information and assets are the responsibility of everyone within the organisation.

Third-party suppliers who process, store, or transmit Reach Subsea related information or assets shall be effectively managed to reduce and control security risks.

Reach Subsea commit to measure and monitor its security performance and improve its defences and security controls accordingly.

All personnel within the organization are responsible for the reporting, responding and learning from security incidents.

Resources are provided to develop, implement and maintain the security management system, including continuous training and awareness.

Jostein Alendal
